 LeetCode

SUMMARY

Full Stack Developer with experience delivering freelance and client-based web solutions along with industry internship exposure. Skilled in React.js, Node.js, Next.js, Express.js, Spring Boot, and MongoDB, with a strong focus on building scalable, real-time, and cloud-deployed applications. Successfully developed projects like ImagineX, NoteSphere, and SnapBuy, ensuring performance optimization and user-centric design. Solved 500+ DSA problems, demonstrating strong problem-solving, clean coding, and effective communication skills. Actively seeking freelance and full-time software development opportunities.

EXPERIENCE

- Full Stack Developer Intern, Unique Tutor Arc Pvt. (Devi Zones)

10/2024 – 01/2025

 - Spearheaded development of an interactive trading simulation platform using **React and Redux** with real-time market data and portfolio tracking, increasing engagement by 20%.
 - Built a comprehensive **admin dashboard with Chart.js** for trade visualization, boosting management efficiency by 25%.
- Freelance Full Stack Developer, BoothBloom

02/2025 – 05/2025

 - Forged real-time availability tracking for the BoothBloom platform using **Node.js, Express, and MongoDB**, improving page load times by 0.7 seconds for event planners searching for photographers.
 - Engineered secure **JWT role-based authentication**, real-time availability tracking, and **payment integration** for BoothBloom’s event photography booking platform, reducing authentication errors by 15%.
- Full Stack Developer Intern, MELE (Make Engineer's Life Easy)

05/2024 – 09/2024

 - Deployed a scalable cloud-based solution leveraging **AWS** services, reducing server costs by 30% and achieving 99.9% application uptime.
 - Optimized code and implemented best practices, improving application security, reducing load times by **35%**, and enhancing overall stability.

TECHNICAL SKILLS

Frontend React.js, Next.js, Tailwind CSS, Redux Toolkit	Cloud & DevOps AWS (EC2, S3), Docker
Backend Node.js, Express.js, Java, Spring Boot, REST APIs	Tools Git, GitHub, Vercel, Postman, API Testing, CI/CD
Databases MongoDB, MySQL, PostgreSQL	Languages C/C++, JavaScript, TypeScript, SQL, Python

PROJECTS

- ImagineX 

Tech Stack: MERN Stack, ClipDrop API | Live

 - Developed a full-stack MERN web application integrating **ClipDrop API** for **AI-powered text-to-image generation**.
 - Built a responsive **React** frontend with RESTful backend services for efficient data handling.
 - Implemented features allowing users to **download generated images** and **increase credits** to generate more **AI** images.
- NoteSphere 

Tech Stack: Next.js, Convex, Tailwind CSS | Live

 - Built a full-stack **note-taking app** with optimized queries and real-time data sync, improving reliability by **40%**.
 - Executed responsive UI with advanced **search features** to enhance user experience.
 - Boosted **mobile engagement** by 50% through cross-platform optimization and smooth performance.
- SnapBuy 

Tech Stack: React, Spring Boot, MongoDB, Razorpay, Docker | Live

 - Architected a full-stack **e-commerce platform (Customer, Seller, Admin)** with secure **OTP** authentication and **Razorpay** integration.
 - Built **seller dashboard** for product and order lifecycle management with analytics and transaction history.
 - Applied customer features including **wishlist, cart, order tracking, and advanced filters** for enhanced UX.

EDUCATION

B.Tech in Computer Science, MAKAUT (WBUT) CGPA: 7.87	2021 – 2025 Asansol, West Bengal
Senior Secondary, B N Collegiate, Patna 83%	2019 – 2021 Patna, Bihar

ACHIEVEMENTS & CERTIFICATIONS

- Solved **500+ DSA** questions on **LeetCode** and **GFG** with **150+ days streak** and **16+ badges**.
- Managed the **Science, Tech, and Coding Club** annual budget of \$1,000 for 10+ workshops.
